2019

Volunteer Contact Tracer
Puskesmas Kecamatan
Duren Sawit, 2020

ORGANIZATION

Head of Information and Communication

Ikatan Alumni Poltekkes
Kemenkes Jakarta 3
2023 - Present

PROFESSIONAL EXPERIENCE

HRGA Staff

PT. Bina San Prima, Karawang | May 2021 - April 2024

- Managed personnel administration, PKWT registration with Disnaker, and mandatory company reporting to Kemenaker.
- Handled employee attendance, shift management, and payroll processing data.
- Registered and managed employee BPJS Kesehatan benefits using the Edabu system.
- Executed end-to-end recruitment and resignation procedures.
- Maintained updated employee databases and organized HRGA documentation.

Contact Tracer (Covid-19)

Puskesmas Kecamatan Duren Sawit | November 2020 - March 2021

- Conducted contact tracing, testing, and treatment monitoring for Covid-19 patients.
- Coordinated follow-up communication and documented case progress to support public health response.

PROFILE STRENGTHS

- Balanced clinical, administrative, and public health experience across healthcare and corporate settings.
- Able to manage patient-facing care while maintaining accurate documentation and operational discipline.
- Quick learner with strong communication, teamwork, problem solving, and loyalty to the organization.

SEHATI - EMR UKS Sekolah Rakyat

An integrated digital healthcare system for school clinic documentation, student health records, medication inventory, reporting, and nursing decision support.

EMR UKS

Role-Based Access

Project Overview

SEHATI is an Electronic Medical Record (EMR) application designed for school health unit services. It helps healthcare staff document student visits, manage patient records, record medication use, generate reports, and maintain a more organized and traceable clinical administration workflow.

Care support

Clinical & Operational Features

- Student/patient identity records and school clinic visit history.
- Documentation of complaints, examination, diagnosis, treatment, notes, referral, and follow-up.
- Medication administration records per visit and minimum stock monitoring.
- Daily and monthly visit reports, PDF/Excel export, and medication mutation reports.

Governance & Safety

- Login with JWT authentication and signed session cookies.
- Admin and nurse roles to restrict page and endpoint access.
- Audit logs for key actions such as login, data edits, and user management.
- Local database backup and migration support to PostgreSQL on Railway.

Role Contribution

- Translated school clinic service needs into a digital workflow covering student registration, visits, treatment, medication, referrals, and reports.
- Provided a nursing and healthcare administration perspective so terminology, forms, and report outputs match real clinical workflows.
- Promoted structured, searchable, and accountable documentation for school healthcare service activities.

SEHATI Application Preview

A visual preview of the EMR application interface used as supporting project evidence.

SEHATI login page - an integrated digital healthcare service system for Sekolah Rakyat.

Technical Scope

- Backend API built with FastAPI, using local SQLite storage and PostgreSQL support for deployment.
- Data model includes users, audit logs, patients, assessments, recommendations, school clinic visits, medication records, inventory, CKG events, screening stations, referrals, and recommendation letters.
- Deployment prepared with Dockerfile, Procfile, railway.json, Railway documentation, and environment variable configuration.
- Additional integrations include AI care recommendations, WhatsApp notifications via Fonnte, and PDF/Excel report exports.

Portfolio Narrative

This project demonstrates the ability to combine nursing experience, healthcare administration, and digital workflow understanding. Its core value is improving school clinic documentation, reporting, and service traceability while preserving healthcare professionals' clinical judgment.
